

ExecutionTarget

```
classDiagram
    class ExecutionTarget
    class AxiomChecker
    class DefaultTarget
    class ProofHandler
    ExecutionTarget <|-- AxiomChecker
    ExecutionTarget <|-- DefaultTarget
    ExecutionTarget <|-- ProofHandler
```

A UML class diagram illustrating inheritance. At the top is a box labeled 'ExecutionTarget'. Below it are three boxes: 'AxiomChecker' on the left, 'DefaultTarget' in the center, and 'ProofHandler' on the right. A horizontal line connects the three bottom boxes. From the center of this line, a vertical line goes up to a triangle pointing at the 'ExecutionTarget' box, indicating that all three subclasses inherit from the base class.

AxiomChecker

DefaultTarget

ProofHandler
